

Your talent can
make a difference.

Make cancer
history.

You're
a visionary
Scientist.

Would you like to develop innovative products that will help to improve the quality of life? We have a vacancy for a

CTA/chemistry laboratory technician/chemist (B.Sc.) in the Research & Development Division with an emphasis on synthesizing nanoparticles for immunotherapy - m|f

Your role:

- As a member of the Research & Development team, in the Chemistry Department, you will be involved in the modification and synthesis of magnetic nanoparticles.
- Your project scope will include all aspects of the production process, from synthesis, through purification to product analysis.
- You will not only be active in a chemical context, you will also gain insights into biological methods and related topics by your involvement in bio-conjugation of antibodies and the analysis of your final product by flow cytometry.
- Working with our core products means that you bear significant responsibility for the success of our company and will always work with the newest technologies available.
- You are a team player and find it self-evident that you work closely with your colleagues, planning and synchronizing workflows as a team.

Your profile:

- You have successfully completed your training as a chemistry laboratory assistant, a chemistry technician (CTA), or a Bachelor of Chemistry and ideally have already had some professional experience. However, we are also willing to give first-time employees a chance.
- You have a pronounced analytical understanding and your enthusiasm for chemical synthesis and biochemistry is a distinguishing feature.
- You would like to combine your knowledge of chemistry with the biological aspects of your work.
- You not only work independently and responsibly, your high level of initiative and ability to work proactively within a team enable you to drive projects to success.
- Your profile is rounded off by competence in the English language.

Miltényi Biotec continues to grow. Our corporate culture encourages you to develop your own ideas and to provide creative input. Welcome to a team that inspires innovation.

Progress prospers with inspiration and curiosity. For 30 years Miltényi Biotec has been developing products and services that are used in basic research, translational research and cell therapy. Today we are a team of more than 2,200 scientists, physicians, engineers, marketers and numerous other specialists present in 28 countries worldwide. At Miltényi Biotec, innovative ideas are being turned into cutting edge products. Together, we are passionate about driving biomedical progress towards curing severe diseases.
